SUMMARY

Computer Science graduate with hands-on experience in SQL, data reporting, and CRM data management. Improved operational workflows, automated reporting tasks, and supported decision-making using structured analysis. Built multiple end-to-end analytics projects using SQL, Excel, and Power BI, demonstrating skills in data cleaning, EDA, and dashboard development. Committed to continuous learning and contributing reliable, clear insights in a junior data analytics role.

EXPERIENCE

Membership Sales Associate

Unionville Athletic Club

April 2024 - Present, Markham, ON

- Managed 50+ monthly memberships in the CRM with accurate data entry, supporting reliable reporting and sales forecasting
- Built a standardized lead-tracking workflow that ensured 100% follow-up consistency and improved sales team visibility
- Cleaned and organized member databases, reducing manual lookup time for staff and streamlining daily operations
- Compiled weekly membership and revenue summaries used by managers to adjust monthly sales strategies
- Troubleshooted software issues and assisted with light data/tech tasks for non-technical managers, reducing downtime

Recreation Coordinator (Data & Engagement)

Results Lifestyle Fitness

August 2022 - March 2023, Markham, ON

- Tracked daily, weekly, and monthly attendance for 100+ members using Excel and produced visual reports for leadership
- Analyzed program participation trends that supported scheduling changes and increased class utilization by ~15%
- Prepared recurring analytics reports for senior managers to support data-driven operational decisions
- Gathered and organized customer feedback to identify improvement areas and inform program adjustments
- Coordinated with instructors using data insights to align class offerings with member demand

PROJECT

SQL Climber – Upper-Intermediate Certificate

SQL (Advanced Querying) • www.sqlclimber.com/verify/KJNQB7IMZKDA • December 2025

- Completed 331 SQL exercises covering joins, aggregations, CTEs, window functions, and data manipulation

Print Shop RFM Customer Segmentation

Excel, Power BI, PowerPoint • github.com/pvenetis/printshop-RFM-customer-segmentation • September 2025

- Analyzed ~1k+ transactional records and performed RFM segmentation to score customer loyalty and spending patterns
- Identified core revenue drivers, at-risk customers, and low-impact segments based on recency, frequency, and value
- Built supporting dashboards and visuals highlighting seasonal trends and purchase behavior
- Outlined retention, re-engagement, and de-prioritization strategies informed by the segment-level insights

DataFlow SaaS Analysis

SQL, Excel, Power BI • github.com/pvenetis/dataflow-saas-analysis • March 2025

- Normalized and cleaned 120k+ rows across Orders, Products, and Customers to build a relational data model
- Conducted EDA in SQL and Excel to identify revenue trends, product performance, and customer behavior
- Developed a multi-page Power BI dashboard with KPIs for revenue, churn, and geographic performance
- Identified key upselling opportunities to Enterprise Plan clients based on retention and revenue patterns

EDUCATION

Bachelor of Science (Honours), Computer Science

Toronto Metropolitan University (formerly Ryerson University) • Toronto, ON • 2023

- Graduated with distinction
- Dean's List 2019–2022

SKILLS

- **SQL & Data Analysis:** Joins, CTEs, Window Functions, Data Cleaning, Excel (Pivot Tables, Power Query), Python (Pandas, NumPy)
- **Data Visualization:** Power BI (interactive dashboards, DAX fundamentals), Tableau, Excel charts
- **Data Modeling & Tools:** Relational databases, star schema design, fact/dimension tables, ETL workflows, Git/GitHub, CRM systems
