PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with 2 years of experience applying SQL, Power BI, and Excel to operational and business intelligence problems. Reduced manual reporting effort by ~30% through Excel automation, delivering consistent, accurate insights for non-technical stakeholders.

EDUCATION

Toronto Metropolitan University (formerly Ryerson University)

Toronto, ON

Bachelor of Science (Honours), Computer Science

2023

EXPERIENCE

Sales & Operations Analyst

Apr 2024 – Feb 2026

Unionville Athletic Club

Markham, ON

- Reduced recurring reporting effort by ~30% by rebuilding performance reports in Excel using pivot tables and automated formulas, improving consistency and turnaround time for weekly management reviews.
- Analyzed membership and revenue data using Excel to surface pricing and retention insights, directly supporting weekly forecasting decisions and operational planning for club management.
- Standardized lead-tracking workflows in Excel by redesigning pipeline data entry and validation processes, improving data consistency and enabling accurate visibility into sales conversion metrics.
- Tracked and analyzed new membership lead sources across channels, identifying a ~10–15% increase in leads over 2 months by monitoring outreach campaign performance against baseline conversion data.
- Improved CRM data quality and staff reporting adoption by identifying system inconsistencies and delivering targeted tool training, increasing reliability of operational data across departments.

PROJECTS

GTA Gym Market Analysis – Unionville Athletic Club

Feb 2026

- Extracted and cleaned location data for 56 commercial gyms across the GTA via Google Places API and Python, filtering out 30 non-relevant facilities to build a structured competitive dataset.
- Used SQL to analyze gym density, rating tiers, and review volume by area, identifying that Scarborough's high-visibility but low-rated gyms represent a quality differentiation opportunity for mid-tier competitors.
- Built a client-ready Power BI dashboard — including a market density map, quality vs. engagement scatter plot, and competitor ranking — to support Unionville Athletic Club's competitive positioning strategy.

DataFlow SaaS Business Analysis

Apr 2025

- Cleaned and normalized 120K+ orders across Orders, Products, and Country Lookup tables using SQL (joins, CTEs, window functions) to build a structured relational data model for analysis.
- Identified that the Enterprise Plan drove 26.5% of total revenue at an AOV of \$815 and that growth was driven by upselling existing customers rather than new order volume.
- Delivered a multi-page Power BI dashboard tracking KPIs across revenue trends, 5 regional markets, product mix, and refund rates — surfacing that Europe led revenue at \$13.47M with the lowest refund rate of 4.96%.

Print Shop RFM Customer Segmentation

Sep 2025

- Automated RFM scoring and data cleaning for 1,000+ print shop orders using Excel VBA and Power Query, applying percentile-based scoring logic to segment customers into 5 behavioral tiers.
- Found that 136 Best and Loyal customers (27% of the base) generated ~70% of total revenue, while 81 Potential Loyal customers contributed 22% of revenue and represented the highest growth opportunity.
- Built a single-page Power BI dashboard visualizing segment distribution, revenue contribution, and product mix per segment — with targeted retention and re-engagement recommendations for each tier.

TECHNICAL SKILLS

Languages & Tools: SQL (PostgreSQL, MySQL, MS SQL Server), Python (pandas, NumPy, matplotlib), Excel (Power Query, Pivot Tables, VBA), Power BI (DAX), GCP (APIs, data extraction)

Data Analysis: Exploratory Data Analysis (EDA), Data Modeling, ETL, Data Cleaning, Data Storytelling

Business & Project Skills: Stakeholder Communication, Agile/Scrum, Jira, Confluence, Business Reporting
