PROFESSIONAL SUMMARY

Computer Science graduate transitioning into Data Analytics with strong SQL skills and hands-on experience in Power BI, Excel, and ETL workflows. Proven ability to turn raw operational data into actionable insights — from automating reporting processes to building dashboards that support pricing, sales, and competitive strategy.

EDUCATION

Toronto Metropolitan University (formerly Ryerson University)

Toronto, ON

Bachelor of Science (Honours), Computer Science

2023

EXPERIENCE

Sales & Operations Analyst

Apr 2024 – Feb 2026

Unionville Athletic Club

Markham, ON

- Standardized lead-tracking workflows in Excel, improving data consistency and increasing visibility into conversion metrics across the sales pipeline.
- Streamlined recurring performance reports in Excel using pivot tables and formulas, reducing manual reporting effort by ~30% and improving reporting consistency.
- Analyzed membership and revenue data to support weekly forecasting, pricing adjustments, and operational planning.
- Initiated a door-to-door marketing campaign and coordinated a local restaurant partnership, contributing to a ~10–15% increase in new membership leads over a 2-month period.
- Provided technical support for CRM and internal systems, identifying software issues and improving staff adoption of reporting tools.

PROJECTS

GTA Gym Market Analysis

Feb 2026

- Extracted and cleaned data for 100–200 GTA fitness locations via Google Places API and Python, building a structured dataset for competitive analysis.
- Analyzed regional gym density, service offerings, and rating tiers to assess competitive positioning and identify underserved markets.
- Developed an interactive Power BI dashboard surfacing competitive gaps and expansion opportunities with location-level recommendations.

DataFlow SaaS Business Analysis

Apr 2025

- Cleaned and normalized 120k+ records across Orders, Products, and Customers to design a structured relational data model.
- Identified revenue trends, churn patterns, and product performance drivers through SQL and Excel-based exploratory analysis.
- Delivered a multi-page Power BI dashboard for KPI tracking across revenue, retention, and geographic performance.

Print Shop RFM Customer Segmentation

Sep 2025

- Automated data cleaning and RFM calculation for 1,000+ transactional records using Excel VBA, ensuring repeatable customer segmentation.
- Identified revenue drivers and at-risk segments by analyzing Recency, Frequency, and Monetary metrics across the customer base.
- Built Power BI dashboards highlighting seasonal trends and segment distribution to inform retention and re-engagement strategy.

TECHNICAL SKILLS

Languages & Tools: SQL (PostgreSQL, MySQL, MS SQL Server), Python (pandas, NumPy, matplotlib), Excel (Power Query, Pivot Tables, VBA), Power BI (DAX), GCP (APIs, data extraction)

Data Analysis: Exploratory Data Analysis (EDA), Data Modeling, ETL, Data Cleaning, Data Storytelling

Business & Project Skills: Stakeholder Communication, Agile/Scrum, Jira, Confluence, CRISP-DM, Documentation
