SUMMARY

Computer Science graduate with experience in data reporting and process improvement. Skilled in SQL, Excel, CRM systems, and data analysis, with the ability to translate raw data into actionable insights. Seeking an entry-level data analytics role to support data-driven business decisions.

EXPERIENCE

Membership Sales Associate

Unionville Athletic Club

April 2024 – Present, Markham, ON

- Managed 50+ monthly contracts in CRM, ensuring accurate data entry, and timely reporting
- Developed lead follow-up tracking methods, improving management's outreach efficiency
- Organized member databases, and streamlined workflow documentation to optimize processes
- Collected and summarized membership and revenue data for weekly reports, informing sales strategies
- Troubleshooted software issues for non-technical managers, enhancing operational workflows

Recreation Coordinator (Data & Engagement)

Results Lifestyle Fitness

August 2022 – March 2023, Markham, ON

- Tracked daily, weekly, and monthly member attendance in Excel, producing summary reports, and visualizations for management review
- Analyzed program participation to identify usage trends, informing scheduling and class offerings
- Prepared regular statistical reports and evaluations for senior managers, ensuring data-driven decision-making
- Delivered customer service by addressing member inquiries, and recording feedback to improve operations
- Coordinated with instructors to align program offerings with member demand, leveraging attendance data analysis

PROJECT

SQL Climber – Upper-Intermediate Certificate

SQL Climber • November 2025 – November 2025

- Completed 331 SQL exercises across 5 sections, demonstrating strong skills in querying, data manipulation, and problem-solving

Print Shop RFM Customer Segmentation

Portfolio Project • github.com/pvenetis/printshop-RFM-customer-segmentation • September 2025 – November 2025

- Analyzed 3,900 transactions to uncover customer behavior, spending patterns, and product preferences
- Developed SQL queries to segment customers and identify high-value products
- Built interactive Power BI dashboard visualizing revenue trends, seasonal performance, and purchase behavior
- Derived insights on discounts, review-spend correlation, and product preferences to inform marketing and inventory

DataFlow SaaS Analysis

Portfolio Project • github.com/pvenetis/dataflow-saas-analysis • March 2025 – May 2025

- Built relational data model by normalizing and cleaning Orders, Products, and Customers tables in SQL
- Conducted exploratory data analysis in SQL and Excel to identify trends in revenue, order volume, and customer behavior
- Developed multi-page Power BI dashboard with KPIs and visualizations for revenue, products, and geographic insights
- Derived insights on upselling to Enterprise Plan customers, highlighting retention and high-value revenue streams

EDUCATION

Bachelor of Science (Honours), Computer Science

Toronto Metropolitan University (formerly Ryerson University) • Toronto, ON • 2023

- Graduated with distinction
- Honor's Dean's List (2019-2022)
