EDUCATION

Toronto Metropolitan University (formerly Ryerson University)

Bachelor of Science (Honours), Computer Science

Toronto, ON

2023

EXPERIENCE

Data Consultant — Freelance

March 2026 – Present

Strategy Analytics Co.

Markham, ON

- Led end-to-end analytics projects for small business clients, transforming 50k+ API and CRM records into structured datasets for market and competitive analysis.
- Extracted, cleaned, and validated multi-source data using SQL and Python, reducing manual preparation time and improving reporting reliability.
- Performed exploratory analysis to evaluate competitor density, pricing trends, and customer ratings across 100+ locations in the GTA.
- Built interactive Power BI dashboards consolidating key KPIs, reducing ad-hoc reporting requests and improving stakeholder visibility into performance metrics.
- Delivered executive-ready reports summarizing quantified market gaps and supporting client expansion and pricing strategy discussions.
- Documented ETL workflows and data models to ensure reproducibility and consistent data integrity across engagements.

Membership Sales Associate

April 2024 – Feb 2026

Unionville Athletic Club

Markham, ON

- Managed and analyzed 50+ monthly membership records within CRM systems, improving reporting accuracy and forecasting reliability.
- Standardized lead-tracking workflows, achieving 100% follow-up consistency and increasing visibility into conversion metrics.
- Cleaned and optimized membership databases, reducing manual lookup time by 30% and improving operational efficiency.
- Compiled weekly revenue and membership reports used by leadership to adjust pricing and sales strategies.
- Provided technical troubleshooting and data support for staff, minimizing operational downtime.

PROJECTS

GTA Gym Market Analysis Dashboard

March 2026

- Extracted and cleaned 50k+ Google Places API records to analyze gym density, ratings, and geographic clustering across the GTA.
- Built a structured relational dataset and performed SQL-based segmentation to identify underserved neighborhoods and competitive gaps.
- Developed an interactive Power BI dashboard visualizing competitor saturation, average ratings, and expansion opportunities.
- Presented data-driven recommendations for market entry positioning and pricing strategy.

DataFlow SaaS Business Analysis

April 2025

- Cleaned and normalized 120k+ records across Orders, Products, and Customers to design a relational data model.
- Conducted SQL and Excel-based exploratory analysis to identify revenue trends, churn patterns, and product performance drivers.
- Developed a multi-page Power BI dashboard tracking KPIs including revenue, retention, and geographic performance.
- Identified upselling opportunities to Enterprise clients based on revenue and customer lifetime value analysis.
