PROFESSIONAL SUMMARY

Recent Computer Science graduate (2023) transitioning into Data Analytics with 1+ year of hands-on experience in SQL, Python, Excel, and Power BI. Skilled at cleaning, structuring, and visualizing complex datasets to provide actionable insights that inform business decisions. Demonstrated ability to deliver dashboards, reports, and analysis that improve operational performance and support strategic growth initiatives.

EDUCATION

Toronto Metropolitan University (formerly Ryerson University)

Toronto, ON

Bachelor of Science (Honours), Computer Science

2023

EXPERIENCE

Independent Data Consultant

Mar 2026 – Present

Self-Directed / Client Work

Toronto, ON

- Improved reporting reliability and reduced manual data prep by 40% by extracting, cleaning, and structuring datasets from APIs and internal systems (100–200 locations).
- Increased stakeholder visibility into trends and business opportunities by developing interactive Power BI dashboards tracking key KPIs.
- Supported market positioning, pricing decisions, and operational improvements through actionable recommendations derived from SQL and Python analyses.
- Ensured reproducibility and data integrity by documenting ETL workflows and data models across multiple projects.

Membership Sales Associate

Apr 2024 – Feb 2026

Unionville Athletic Club

Markham, ON

- Enhanced forecasting accuracy by maintaining and analyzing 50+ monthly membership and revenue records to support weekly pricing and operational decisions.
- Reduced manual reporting effort by 30% by automating recurring performance reports and improving operational efficiency.
- Increased visibility into sales performance by standardizing lead-tracking and conversion metrics.
- Minimized downtime and improved staff adoption by providing technical support for CRM and reporting tools.

PROJECTS

Print Shop RFM Customer Segmentation

Sep 2025

- Improved customer targeting by analyzing 1k+ transactional records and performing RFM segmentation to score loyalty and spending patterns.
- Identified revenue drivers and at-risk customers by evaluating recency, frequency, and value metrics.
- Enhanced decision-making by building dashboards and visuals highlighting seasonal trends and purchase behavior.
- Informed retention, re-engagement, and de-prioritization strategies through segment-level insights.

DataFlow SaaS Business Analysis

Apr 2025

- Improved KPI tracking and client insight by cleaning and normalizing 120k+ records across Orders, Products, and Customers to design a relational data model.
- Identified revenue trends, churn patterns, and product performance drivers through SQL and Excel-based exploratory analysis.
- Enabled data-driven decisions by developing a multi-page Power BI dashboard tracking revenue, retention, and geographic performance.
- Supported upselling strategies by analyzing revenue and customer lifetime value for Enterprise clients.

TECHNICAL & SOFT SKILLS

Technical Skills: SQL, Python (pandas, NumPy), Power BI, Google Cloud Console, Excel (Pivot Tables, Power Query), ETL workflows, relational databases, data modeling, REST APIs, Git/GitHub, basic machine learning, regression, classification, clustering

Professional Skills: Problem-solving, analytical thinking, effective communication, teamwork, resourcefulness

Personal Achievements: 5K race in 23 min; TCBL Tier 6 Basketball Champion; 1st-place WoW tournament winner
